INSIGHTS:

- * Overall attrition is **16.1%** (237 employees). **Research & Development** records the highest number of exits (133), while **Sales** also requires attention due to its high attrition relative to team size.
- * The workforce is dominated by employees aged **26–35** (606 employees), and **males** account for **60%** of the workforce. These demographics can help guide recruitment, engagement, and diversity initiatives.
- * Employees working **overtime** have nearly **three times** the attrition rate (**30.5%**) compared to employees who do not work overtime (**10.4%**), indicating that workload management could improve employee retention.

Research Scientist
Sales Executive
Sales Representative

INSIGHTS:

Pay rises consistently with job level, confirming the pay-grade structure is intact — compensation is not a broken system.

Sales and Sales Executive roles combine high headcount with elevated attrition — retention effort here has outsized impact.

Attrition is heavily concentrated at Job Level 1 — build a targeted entry-level retention program rather than a blanket policy.

INSIGHTS:

Attrition rate falls consistently as Job Satisfaction rises from 1 to 4 — treat low satisfaction scores as an early-warning signal, not just a survey stat.

Employees with the lowest Work-Life Balance rating (1) have the highest attrition rate (31.3%), despite representing the smallest employee group. Improving work-life balance for this segment could significantly reduce employee turnover.

Attrition is heavily front-loaded in the 0–2 year tenure band and drops sharply after year 6 — the first 24 months is the highest-leverage retention window.
